

STEMMING/SANDING TRUCKS

Ground Force Material Delivery and Stemming bodies assure you get the most from your drilling and explosives dollar. Our bodies are proven, reliable, and working in mines around the world. It is a proven fact that proper stemming

actually “Locks” in the borehole when the powder column detonates, confining the explosives’ energy. The results are better fragmentation, decreased explosives consumption and increased borehole spacing.

FEATURES

- Extendable cross conveyor allows precise material placement
- In-cab mounted operating controls (1 man stemming crew)
- Hydraulic operated grizzly to filter out oversized or frozen material
- Body vibrators to dislodge bridged material
- Capacities starting at 15 yards (11.4 yards struck)
- Options include road sanding and more
